CCNO Human siRNA Oligo Duplex (Locus ID 10309)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered.

RefSeq: NM 001024592, NM 021147, NR 125346, NR 125347, NR 125348

UniProt ID: P22674

Synonyms: UDG2, FLJ22422

CCNO (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 10309)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: This gene encodes a member of the cyclin protein family, and the encoded protein is involved

in regulation of the cell cycle. Disruption of this gene is associated with primary ciliary

dyskinesia-19. Alternative splicing results in multiple transcript variants. This gene, which has

a previous symbol of UNG2, was erroneously identified as a uracil DNA glycosylase in

PubMed ID: 2001396. A later publication, PubMed ID: 8419333, identified this gene's product

as a cyclin protein family member. The UNG2 symbol is also used as a specific protein

isoform name for the UNG gene (GeneID 7374), so confusion exists in the scientific literature

and in some databases for these two genes. [provided by RefSeq, Jul 2014]

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
