ERC1 Human siRNA Oligo Duplex (Locus ID 23085)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered.

RefSeq: NM 001301248, NM 015064, NM 032684, NM 178037, NM 178038, NM 178039, NM 178040,

NR 027946, NR 027948, NR 027949

UniProt ID: Q8IUD2

Synonyms: Cast2; ELKS; ERC-1; RAB6IP2

Components: ERC1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 23085)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: The protein encoded by this gene is a member of a family of RIM-binding proteins. RIMs are

active zone proteins that regulate neurotransmitter release. This gene has been found fused

to the receptor-type tyrosine kinase gene RET by gene rearrangement due to the

translocation t(10;12)(q11;p13) in thyroid papillary carcinoma. Alternative splicing results in

multiple transcript variants. [provided by RefSeq, Jul 2014]

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
