C12orf48 (PARPBP) Human siRNA Oligo Duplex (Locus ID 55010)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered.

RefSeq: NM 001319988, NM 001319993, NM 001319994, NM 001319995, NM 001319996,

NM 017915, NR 135123

UniProt ID: Q9NWS1

Synonyms: AROM; C12orf48; PARI

Components: PARPBP (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 55010)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: Required to suppress inappropriate homologous recombination, thereby playing a central

role DNA repair and in the maintenance of genomic stability. Antagonizes homologous

recombination by interfering with the formation of the RAD51-DNA homologous

recombination structure. Binds single-strand DNA and poly(A) homopolymers. Positively regulate the poly(ADP-ribosyl)ation activity of PARP1; however such function may be indirect.

[UniProtKB/Swiss-Prot Function]

C12orf48 (PARPBP) Human siRNA Oligo Duplex (Locus ID 55010) - SR310423

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
