### Carbonic anhydrase X (CA10) Human siRNA Oligo Duplex (Locus ID 56934)

**Product data:** 

**Product Type:** siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

**Stability:** One year from date of shipment when stored at -20°C.

# of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

 Note:
 Single siRNA duplex (10nmol) can be ordered.

 RefSeq:
 NM 001082533, NM 001082534, NM 020178

UniProt ID: Q9NS85

**Synonyms:** CA-RPX; CARPX; HUCEP-15

Components: CA10 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 56934)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

**Summary:** This gene encodes a protein that belongs to the carbonic anhydrase family of zinc

metalloenzymes, which catalyze the reversible hydration of carbon dioxide in various

biological processes. The protein encoded by this gene is an acatalytic member of the alphacarbonic anhydrase subgroup, and it is thought to play a role in the central nervous system, especially in brain development. Multiple transcript variants encoding the same protein have

been found for this gene. [provided by RefSeq, Jul 2008]

#### Carbonic anhydrase X (CA10) Human siRNA Oligo Duplex (Locus ID 56934) - SR311258

# Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
