LEPRE1 (P3H1) Human siRNA Oligo Duplex (Locus ID 64175)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered. **RefSeq:** NM 001146289, NM 001243246, NM 022356

UniProt ID: Q32P28

Synonyms: GROS1; LEPRE1; OI8

Components: P3H1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 64175)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: This gene encodes an enzyme that is a member of the collagen prolyl hydroxylase family.

These enzymes are localized to the endoplasmic reticulum and their activity is required for

proper collagen synthesis and assembly. Mutations in this gene are associated with

osteogenesis imperfecta type VIII. Three alternatively spliced transcript variants encoding different isoforms have been described. Other variants may exist, but their biological validity

has not been determined. [provided by RefSeq, Aug 2011]

LEPRE1 (P3H1) Human siRNA Oligo Duplex (Locus ID 64175) - SR311985

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
