## **ZFYVE19 Human siRNA Oligo Duplex (Locus ID 84936)**

#### **Product data:**

**Product Type:** siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

**Stability:** One year from date of shipment when stored at -20°C.

# of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

**Note:** Single siRNA duplex (10nmol) can be ordered.

RefSeq: <u>NM 001077268</u>, <u>NM 001258420</u>, <u>NM 001258421</u>, <u>NM 032850</u>

UniProt ID: Q96K21

Synonyms: ANCHR; MPFYVE

Components: ZFYVE19 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 84936)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

**Summary:** Key regulator of abscission step in cytokinesis: part of the cytokinesis checkpoint, a process

required to delay abscission to prevent both premature resolution of intercellular

chromosome bridges and accumulation of DNA damage. Together with CHMP4C, required to retain abscission-competent VPS4 (VPS4A and/or VPS4B) at the midbody ring until abscission checkpoint signaling is terminated at late cytokinesis. Deactivation of AURKB results in

dephosphorylation of CHMP4C followed by its dissociation from ZFYVE19/ANCHR and VPS4

and subsequent abscission.[UniProtKB/Swiss-Prot Function]

### ZFYVE19 Human siRNA Oligo Duplex (Locus ID 84936) - SR313753

# Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
