

Product datasheet for SR316406

SPATA24 Human siRNA Oligo Duplex (Locus ID 202051)

Product data:

C purified ted by ESI-MS ilable with shipment e year from date of shipment when stored at -20°C. proximately 330 transfections/2nmol in 24-well plate under optimized conditions (final c. 10 nM). gle siRNA duplex (10nmol) can be ordered. <u>194296</u>
ilable with shipment e year from date of shipment when stored at -20°C. proximately 330 transfections/2nmol in 24-well plate under optimized conditions (final c. 10 nM). gle siRNA duplex (10nmol) can be ordered. <u>194296</u>

DC161; T6441
TA24 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 202051) uded - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol uded - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml
ds DNA with high affinity but does not bind to TATA boxes. Synergises with GMNN and in activation of TATA box-containing promoters and with GMNN and TBPL1 in activation he NF1 TATA-less promoter. May play a role in cytoplasm movement and removal during rmiogenesis (By similarity).[UniProtKB/Swiss-Prot Function]
Gene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will vide at least 70% or more knockdown of the target mRNA when used at 10 nM centration by quantitative RT-PCR when the TYE-563 fluorescent transfection control olex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT itive control (cat# SR30003) provides 90% knockdown efficiency. non-conforming siRNA, requests for replacement product must be made within ninety days from the date of delivery of the siRNA kit. To arrange for a free replacement with <i>I</i> ly designed duplexes, please contact Technical Services at techsupport@origene.com. ase provide your data indicating the transfection efficiency and measurement of gene
