## Product datasheet for SR319393

## beta Arrestin 1 (ARRB1) Human siRNA Oligo Duplex (Locus ID 408)

## **Product data:**

| Product Type:       | siRNA Oligo Duplexes  |
|---------------------|---|
| Purity:             | HPLC purified   |
| Quality Control:    | Tested by ESI-MS  |
| Sequences:          | Available with shipment   |
| Stability:          | One year from date of shipment when stored at -20°C.  |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).  |
| Note:               | Single siRNA duplex (10nmol) can be ordered.  |
| RefSeq:             | <u>NM 004041, NM 020251</u>   |
| UniProt ID:         | <u>P49407</u>   |
| Synonyms:           | ARB1; ARR1  |
| Components:         | ARRB1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 408)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml   |
| Summary:            | Members of arrestin/beta-arrestin protein family are thought to participate in agonist-<br>mediated desensitization of G-protein-coupled receptors and cause specific dampening of<br>cellular responses to stimuli such as hormones, neurotransmitters, or sensory signals.<br>Arrestin beta 1 is a cytosolic protein and acts as a cofactor in the beta-adrenergic receptor<br>kinase (BARK) mediated desensitization of beta-adrenergic receptors. Besides the central<br>nervous system, it is expressed at high levels in peripheral blood leukocytes, and thus the<br>BARK/beta-arrestin system is believed to play a major role in regulating receptor-mediated<br>immune functions. Alternatively spliced transcripts encoding different isoforms of arrestin<br>beta 1 have been described. [provided by RefSeq, Jan 2011] |

|                            | beta Arrestin 1 (ARRB1) Human siRNA Oligo Duplex (Locus ID 408) – SR319393   |
|----------------------------|--|
| Performance<br>Guaranteed: | OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br>positive control (cat# SR30003) provides 90% knockdown efficiency.  |
|                            | For non-conforming siRNA, requests for replacement product must be made within ninety<br>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br>Please provide your data indicating the transfection efficiency and measurement of gene<br>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data<br>required). |
