#### **SNAIL (SNAI1) Human siRNA Oligo Duplex (Locus ID 6615)**

#### **Product data:**

**Product Type:** siRNA Oligo Duplexes

Purity: HPLC purified

**Quality Control:** Tested by ESI-MS

Sequences: Available with shipment

**Stability:** One year from date of shipment when stored at -20°C.

# of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

**Note:** Single siRNA duplex (10nmol) can be ordered.

**RefSeq:** <u>NM 005985</u>

UniProt ID: <u>095863</u>

Synonyms: dJ710H13.1; SLUGH2; SNA; SNAH; SNAIL; SNAIL1

Components: SNAI1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 6615)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

**Summary:** The Drosophila embryonic protein snail is a zinc finger transcriptional repressor which

downregulates the expression of ectodermal genes within the mesoderm. The nuclear

protein encoded by this gene is structurally similar to the Drosophila snail protein, and is also

thought to be critical for mesoderm formation in the developing embryo. At least two

variants of a similar processed pseudogene have been found on chromosome 2. [provided by

RefSeq, Jul 2008]

# Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
