## Product datasheet for SR323524

## ARMER (ARL6IP1) Human siRNA Oligo Duplex (Locus ID 23204)

## **Product data:**

| Product Type:       | siRNA Oligo Duplexes  |
|---------------------|---|
| Purity:             | HPLC purified   |
| Quality Control:    | Tested by ESI-MS  |
| Sequences:          | Available with shipment   |
| Stability:          | One year from date of shipment when stored at -20°C.  |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).  |
| Note:               | Single siRNA duplex (10nmol) can be ordered.  |
| RefSeq:             | <u>NM 001313858, NM 015161</u>  |
| UniProt ID:         | <u>Q15041</u>   |
| Synonyms:           | AIP1; ARL6IP; ARMER; SPG61  |
| Components:         | ARL6IP1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 23204)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml   |
| Summary:            | This gene belongs to the ARL6ip family and encodes a transmembrane protein that is<br>predominantly localized to intracytoplasmic membranes. It is highly expressed in early<br>myeloid progenitor cells and thought to be involved in protein transport, membrane<br>trafficking, or cell signaling during hematopoietic maturation. Mutations in this gene are<br>associated with spastic paraplegia 61 (SPG61). Alternatively spliced transcript variants have<br>been found for this gene. [provided by RefSeq, Sep 2015] |

|                            | ARMER (ARL6IP1) Human siRNA Oligo Duplex (Locus ID 23204) – SR323524  |
|----------------------------|---|
| Performance<br>Guaranteed: | OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br>positive control (cat# SR30003) provides 90% knockdown efficiency. |
|                            | For non-conforming siRNA, requests for replacement product must be made within ninety<br>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br>Please provide your data indicating the transfection efficiency and measurement of gene  |

expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data

required).
