COLEC12 Human siRNA Oligo Duplex (Locus ID 81035)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered.

RefSeq: <u>NM 030781</u>, <u>NM 130386</u>

UniProt ID: Q5KU26

Synonyms: CLP1; CLP1, NSR2, SRCL, SCARA4; collectin placenta 1; collectin sub-family member 12; NSR2;

nurse cell scavenger receptor 2; SCARA4; scavenger receptor class A, member 4; scavenger

receptor with C-type lectin; SRCL

Components: COLEC12 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 81035)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: This gene encodes a member of the C-lectin family, proteins that possess collagen-like

sequences and carbohydrate recognition domains. This protein is a scavenger receptor that displays several functions associated with host defense. It can bind to carbohydrate antigens

on microorganisms, facilitating their recognition and removal. It also mediates the

recognition, internalization, and degradation of oxidatively modified low density lipoprotein

by vascular endothelial cells. [provided by RefSeq, May 2018]

COLEC12 Human siRNA Oligo Duplex (Locus ID 81035) - SR325161

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
