

## Product datasheet for **SR400863**

### Defa6 Mouse siRNA Oligo Duplex (Locus ID 13240)

#### Product data:

Product Type:	siRNA Oligo Duplexes
Purity:	HPLC purified
Quality Control:	Tested by ESI-MS
Sequences:	Available with shipment
Stability:	One year from date of shipment when stored at -20°C.
# of transfections:	Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).
Note:	Single siRNA duplex (10nmol) can be ordered.
RefSeq:	<u><a href="#">NM_007852</a></u>
UniProt ID:	<u><a href="#">P50704</a></u>
Synonyms:	Defcr6
Components:	Defa6 (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 13240) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNase free siRNA Duplex Resuspension Buffer - 2 ml
Summary:	Has broad-spectrum antimicrobial properties. Has antibacterial activity against the Gram-positive bacterium <i>L.monocytogenes</i> EGD and the Gram-negative bacteria <i>E.coli</i> ML-35p and avirulent <i>S.typhimurium</i> 7953, but not against the mouse-virulent <i>S.typhimurium</i> 14028S. Probably contributes to the antimicrobial barrier function of the small bowel mucosa. [UniProtKB/Swiss-Prot Function]

**Performance  
Guaranteed:**

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
