

Product datasheet for **SR404043**

Sap18b Mouse siRNA Oligo Duplex (Locus ID 100041953)

Product data:

Product Type:	siRNA Oligo Duplexes
Purity:	HPLC purified
Quality Control:	Tested by ESI-MS
Sequences:	Available with shipment
Stability:	One year from date of shipment when stored at -20°C.
# of transfections:	Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).
Note:	Single siRNA duplex (10nmol) can be ordered.
RefSeq:	<u>NM_001142441</u>
Synonyms:	ENSMUSG00000061104; Gm10094
Components:	Sap18b (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 100041953) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNase free siRNA Duplex Resuspension Buffer - 2 ml
Summary:	This intronless gene is highly similar to the multi-exon Sap18 gene on chromosome 14, whose product functions in transcriptional repression as a component of the Sin3 histone deacetylase complex. This gene may possibly be a Sap18 pseudogene, but it is represented as protein-coding because it appears to be transcribed and has an intact ORF that would result in a protein that is 100% identical to the Sap18 protein. [provided by RefSeq, Dec 2008]
Performance Guaranteed:	OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
