

Product datasheet for **SR405470**

Ntf5 Mouse siRNA Oligo Duplex (Locus ID 78405)

Product data:

Product Type:	siRNA Oligo Duplexes
Purity:	HPLC purified
Quality Control:	Tested by ESI-MS
Sequences:	Available with shipment
Stability:	One year from date of shipment when stored at -20°C.
# of transfections:	Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).
Note:	Single siRNA duplex (10nmol) can be ordered.
RefSeq:	<u>NM_198190</u>
UniProt ID:	<u>Q80VU4</u>
Synonyms:	2900040K06Rik; AI462899; NT; NT-; NT-4; NT-5; NT4; NT4/; NT4/5; Ntf; Ntf-; Ntf-5; Ntf4
Components:	Ntf5 (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 78405) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNase free siRNA Duplex Resuspension Buffer - 2 ml
Summary:	This gene encodes a secreted protein belonging to the neurotrophin family of structurally related molecules that play a crucial role in the control of neuronal numbers and of dendritic growth. The encoded preproprotein undergoes post-translational processing to generate non-covalently associated homodimeric functional protein. Mice deficient in the encoded protein exhibit a loss of sensory neurons in the nodose-petrosal and geniculate ganglia, have deficits in long-term memory and hippocampal long-lasting long-term potentiation. [provided by RefSeq, Oct 2015]

**Performance
Guaranteed:**

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
