Pithd1 Mouse siRNA Oligo Duplex (Locus ID 66193)

Product data:

Product Type: siRNA Oligo Duplexes

HPLC purified **Purity:**

Quality Control: Tested by ESI-MS

Available with shipment **Sequences:**

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Single siRNA duplex (10nmol) can be ordered. Note:

RefSeq: NM 025411 **UniProt ID:** O8BWR2

Synonyms: 1110049F12Rik; AA408179; Trp26

Components: Pithd1 (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 66193)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Promotes megakaryocyte differentiation by up-regulating RUNX1 expression **Summary:**

(PubMed:25134913). Regulates RUNX1 expression by activating the proximal promoter of the

RUNX1 gene and by enhancing the translation activity of an internal ribosome entry site

(IRES) element in the RUNX1 gene (By similarity).[UniProtKB/Swiss-Prot Function]

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will **Performance Guaranteed:**

provide at least 70% or more knockdown of the target mRNA when used at 10 nM

concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT

positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data

required).
