

## Product datasheet for SR413256

### Vrk1 Mouse siRNA Oligo Duplex (Locus ID 22367)

#### **Product data:**

**Purity:** 

Stability:

Note:

**RefSeq:** 

**UniProt ID:** 

Synonyms:

### **Product Type:** siRNA Oligo Duplexes HPLC purified **Quality Control:** Tested by ESI-MS Available with shipment Sequences: One year from date of shipment when stored at -20°C. # of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM). Single siRNA duplex (10nmol) can be ordered. NM 001029843, NM 001029844, NM 011705, NM 001364365, NM 001364367, NM 001364368 Q80X41 51PK

**Components:** Vrk1 (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 22367) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Serine/threonine kinase involved in Golgi disassembly during the cell cycle: following Summary: phosphorylation by PLK3 during mitosis, required to induce Golgi fragmentation. Acts by mediating phosphorylation of downstream target protein. Phosphorylates 'Thr-18' of p53/TP53 and may thereby prevent the interaction between p53/TP53 and MDM2. Phosphorylates casein and histone H3. Phosphorylates BANF1: disrupts its ability to bind DNA, reduces its binding to LEM domain-containing proteins and causes its relocalization from the nucleus to the cytoplasm. Phosphorylates ATF2 which activates its transcriptional activity (By similarity).[UniProtKB/Swiss-Prot Function]

	Vrk1 Mouse siRNA Oligo Duplex (Locus ID 22367) – SR413256
Performance Guaranteed:	OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.
	For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
