

## Product datasheet for **SR413898**

### **lqcg Mouse siRNA Oligo Duplex (Locus ID 69707)**

#### **Product data:**

|                            |  |
|----------------------------|--|
| <b>Product Type:</b>       | siRNA Oligo Duplexes   |
| <b>Purity:</b>             | HPLC purified  |
| <b>Quality Control:</b>    | Tested by ESI-MS   |
| <b>Sequences:</b>          | Available with shipment  |
| <b>Stability:</b>          | One year from date of shipment when stored at -20°C.   |
| <b># of transfections:</b> | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).   |
| <b>Note:</b>               | Single siRNA duplex (10nmol) can be ordered.   |
| <b>RefSeq:</b>             | <u><a href="#">NM_178378</a></u>   |
| <b>UniProt ID:</b>         | <u><a href="#">Q80W32</a></u>  |
| <b>Synonyms:</b>           | 2400003L07Rik; esgd12d; G1-374-12; repro1; stubby12d   |
| <b>Components:</b>         | lqcg (Mouse) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 69707)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNase free siRNA Duplex Resuspension Buffer - 2 ml   |
| <b>Summary:</b>            | Component of the nexin-dynein regulatory complex (N-DRC), a key regulator of ciliary/flagellar motility which maintains the alignment and integrity of the distal axoneme and regulates microtubule sliding in motile axonemes. Binds calmodulin when cellular Ca(2+) levels are low and thereby contributes to the regulation of calcium and calmodulin-dependent protein kinase IV (CAMK4) activity; contributes to the regulation of CAMK4 signaling cascades (By similarity). Required for normal axoneme assembly in sperm flagella, normal sperm tail formation and for male fertility (PubMed:24362311, PubMed:24849454). [UniProtKB/Swiss-Prot Function] |

**Performance  
Guaranteed:**

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at [techsupport@origene.com](mailto:techsupport@origene.com). Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
