| Summary:            | Acyl-CoA thioesterases are a group of enzymes that catalyze the hydrolysis of acyl-CoAs to<br>the free fatty acid and coenzyme A (CoASH), providing the potential to regulate intracellular<br>levels of acyl-CoAs, free fatty acids and CoASH (PubMed:16141203, PubMed:16940157). In<br>contrast to human peroxisomal succinyl-coenzyme A thioesterase/ACOT4, mouse ACOT4 is<br>essentially a succinyl-CoA thioesterase with no activity with medium to long chain saturated<br>acyl-CoAs and with a low activity toward glutaryl-CoA (PubMed:16141203, PubMed:16940157).<br>[UniProtKB/Swiss-Prot Function] |

# **CRIGENE**Acot4 Mouse siRNA Oligo Duplex (Locus ID 171282) - SR413957Performance<br/>Guaranteed:OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br/>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br/>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br/>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br/>positive control (cat# SR30003) provides 90% knockdown efficiency.For non-conforming siRNA, requests for replacement product must be made within ninety<br/>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br/>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br/>Please provide your data indicating the transfection efficiency and measurement of gene<br/>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data

required).
