Dhx30 Rat siRNA Oligo Duplex (Locus ID 367172)

Product data:

Product Type: siRNA Oligo Duplexes

Purity: HPLC purified

Quality Control: Tested by ESI-MS

Sequences: Available with shipment

Stability: One year from date of shipment when stored at -20°C.

of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

Note: Single siRNA duplex (10nmol) can be ordered.

RefSeq: <u>NM 001013249</u>

UniProt ID: Q5BJS0

Synonyms: MGC109411

Components: Dhx30 (Rat) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 367172)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

Summary: RNA-dependent helicase (By similarity). Plays an important role in the assembly of the

mitochondrial large ribosomal subunit (By similarity). Associates with mitochondrial DNA (By

similarity). Required for optimal function of the zinc-finger antiviral protein ZC3HAV1

(PubMed:21204022). Involved in nervous system development and differentiation through its involvement in the up-regulation of a number of genes which are required for neurogenesis,

including GSC, NCAM1, neurogenin, and NEUROD (By similarity).[UniProtKB/Swiss-Prot

Function]

Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
