| rioduct data.       |   |
|---------------------|---|
| Product Type:       | siRNA Oligo Duplexes  |
| Purity:             | HPLC purified   |
| Quality Control:    | Tested by ESI-MS  |
| Sequences:          | Available with shipment   |
| Stability:          | One year from date of shipment when stored at -20°C.  |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).  |
| Note:               | Single siRNA duplex (10nmol) can be ordered.  |
| RefSeq:             | <u>NM 001009624</u>   |
| UniProt ID:         | <u>Q510J4</u>   |
| Synonyms:           | Fam33a; RGD1307084  |
| Components:         | Ska2 (Rat) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 287598)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml   |
| Summary:            | Component of the SKA1 complex, a microtubule-binding subcomplex of the outer<br>kinetochore that is essential for proper chromosome segregation. Required for timely<br>anaphase onset during mitosis, when chromosomes undergo bipolar attachment on spindle<br>microtubules leading to silencing of the spindle checkpoint. The SKA1 complex is a direct<br>component of the kinetochore-microtubule interface and directly associates with<br>microtubules as oligomeric assemblies. The complex facilitates the processive movement of<br>microspheres along a microtubule in a depolymerization-coupled manner. In the complex, it<br>is required for SKA1 localization. Affinity for microtubules is synergistically enhanced in the<br>presence of the ndc-80 complex and may allow the ndc-80 complex to track depolymerizing<br>microtubules.[UniProtKB/Swiss-Prot Function] |

|                            | Ska2 Rat siRNA Oligo Duplex (Locus ID 287598) – SR514938   |
|----------------------------|--|
| Performance<br>Guaranteed: | OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br>positive control (cat# SR30003) provides 90% knockdown efficiency.                              |
|                            | For non-conforming siRNA, requests for replacement product must be made within ninety<br>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br>Please provide your data indicating the transfection efficiency and measurement of gene<br>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data |

required).
