Immunoprecipitation (IP) experiments were performed with negative control lysate (Cat# LY40001) generated by transfecting HEK293T cells with pCMV-entry empty vector (Cat# [PS100001]), and with overexpression lysate (Cat# [LY400339]) generated by transfecting TrueORF Gold cDNA clone myc-DDK tagged PON3 (Cat# [RC210019]) to HEK293T cells.
