

## Product datasheet for **TA160053**

### SARS-CoV Spike Protein Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Recommended Dilution:	ELISA: 1 ug/ml The antibody will detect 5 ng of free peptide at 1 µg/ml.
Reactivity:	SARS-CoV
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	The antibody was raised against a peptide corresponding to 15 amino acids between aa 650-700 near the center of SARS-CoV Spike glycoprotein. Predicted reactivity based on immunogen sequence to SARS-CoV2 Spike protein unlikely: identity 40%, homology 56%.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Database Link:	<a href="#">P59594</a>
Background:	SARS Spike Antibody: A novel coronavirus has recently been identified as the causative agent of SARS (Severe Acute Respiratory Syndrome). Coronaviruses are a major cause of upper respiratory diseases in humans. The genomes of these viruses are positive-stranded RNA approximately 27-31kb in length. SARS infection can be mediated by the binding of the viral spike protein, a glycosylated 139 kDa protein and the major surface antigen of the virus, to the angiotensin-converting enzyme 2 (ACE2) on target cells. This binding can be blocked by a soluble form of ACE2.

Antibodies: SARS-CoV Spike Antibody, TA160053 (1 µg/mL). A direct ELISA was performed using immunogen as coating antigen and the anti-SARS-CoV Spike antibody as the capture antibody. Secondary: Goat anti-rabbit IgG HRP conjugate at 1:20000 dilution. Detection range is from 2 ng/mL to 1000 ng/mL.
