

Product datasheet for **TA160107**

N Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Recommended Dilution:	ELISA: 1 ug/mL
Reactivity:	La Crosse encephalitis virus
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	La Crosse virus nucleocapsid antibody was raised against an 18 amino acid peptide near the center of the La Crosse virus nucleocapsid.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	Predicted: 26 kDa
Background:	La Crosse Virus Nucleocapsid Antibody: La Crosse virus (LCV) is a single-stranded RNA virus that can cause encephalitis in humans and is transmitted predominantly by mosquitoes. It is often mistaken for herpes simplex encephalitis (1). During human infections, LCV initially presents as a nonspecific summertime illness with fever, headache, nausea, vomiting and lethargy. Death occurs in less than 1% of clinical cases.
