Product datasheet for TA302045

c-Myc (MYC) Rabbit Polyclonal Antibody

Product data:

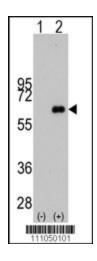

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1:1000
Reactivity:	Human (Predicted: Mouse, Rat, Bovine)
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This MYC antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 351-380 amino acids from human MYC.
Formulation:	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.
Concentration:	lot specific
Purification:	This antibody is purified through a protein A column, followed by peptide affinity purification.
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	48804 Da
Gene Name:	v-myc avian myelocytomatosis viral oncogene homolog
Database Link:	<u>NP_002458</u> <u>Entrez Gene 17869 MouseEntrez Gene 24577 RatEntrez Gene 4609 Human</u> <u>P01106</u>

c-Myc (MYC) Rabbit Polyclonal Antibody – TA302045 Background: MYC is a multifunctional, nuclear phosphoprotein that plays a role in cell cycle progression, apoptosis and cellular transformation. It functions as a transcription factor that regulates transcription of specific target genes. Mutations, overexpression, rearrangement and translocation of the gene encoding MYC have been associated with a variety of hematopoietic tumors, leukemias and lymphomas, including Burkitt lymphoma. There is evidence to show that alternative translation initiations from an upstream, in-frame non-AUG (CUG) and a downstream AUG start site result in the production of two isoforms with distinct N-termini. The synthesis of non-AUG initiated protein is suppressed in Burkitt's lymphomas, suggesting its importance in the normal function of this gene. Synonyms: bHLHe39; c-Myc; MRTL; MYCC **Protein Families:** Druggable Genome, Embryonic stem cells, Induced pluripotent stem cells, Stem cell -Pluripotency, Stem cell relevant signaling - JAK/STAT signaling pathway, Stem cell relevant signaling - TGFb/BMP signaling pathway, Stem cell relevant signaling - Wnt Signaling pathway, **Transcription Factors** Acute myeloid leukemia, Bladder cancer, Cell cycle, Chronic myeloid leukemia, Colorectal **Protein Pathways:** cancer, Endometrial cancer, ErbB signaling pathway, Jak-STAT signaling pathway, MAPK signaling pathway, Pathways in cancer, Small cell lung cancer, TGF-beta signaling pathway, Thyroid cancer, Wnt signaling pathway
