

Product datasheet for TA302184S

Paxillin (PXN) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 1:1000, IHC: 1:10~50
Reactivity:	Human
Host:	Rabbit
Isotype:	Ig
Clonality:	Polyclonal
Immunogen:	This PXN antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 94-125 amino acids from human PXN.
Formulation:	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.
Concentration:	lot specific
Purification:	This antibody is purified through a protein A column, followed by peptide affinity purification.
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	64533 Da
Gene Name:	paxillin
Database Link:	NP_002850 Entrez Gene 5829 Human P49023
Background:	PXN is a cytoskeletal adapter protein involved in organisation and function of focal adhesions, which are critical to cell adhesion and migration. This in turn plays a role in a wide variety of processes including embryogenesis, organogenesis, wound repair, inflammation and cancer. PXN contains LD motifs, LIM domains, SH3 and SH2 binding domains that serve as docking sites for cytoskeletal proteins, tyrosine kinases (e.g., FAK, Pyk 2, Src), serine/threonine kinases, GTPase activating proteins and other adaptor proteins (e.g., Actin, Vinculin, Crk).
Synonyms:	FLJ16691

Protein Families: Druggable Genome, Stem cell - Pluripotency

Protein Pathways: Chemokine signaling pathway, Focal adhesion, Leukocyte transendothelial migration, Regulation of actin cytoskeleton, VEGF signaling pathway

Product images:

Western blot analysis of PXN (arrow) using rabbit polyclonal PXN Antibody (Y118) (Cat.# [TA302184]). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with PXN gene (Lane 2) (Origene Technologies).

Formalin-fixed and paraffin-embedded human prostate carcinoma tissue reacted with PXN Antibody (Y118) (Cat.#[TA302184]), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
