Product datasheet for TA303241

Glucose 6 Phosphate Dehydrogenase (G6PD) Goat Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	ELISA: 1:8,000. WB: 0.1-0.3µg/ml.
Reactivity:	Human (Expected from sequence similarity: Mouse, Rat, Dog)
Host:	Goat
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Peptide with sequence C-KPASTNSDDVRDEK, from the internal region of the protein sequence according to NP_000393.4 ; NP_001035810.1.
Formulation:	Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.
Concentration:	lot specific
Purification:	Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide. Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin. Aliquot and store at -20°C. Minimize freezing and thawing.
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	glucose-6-phosphate dehydrogenase
Database Link:	<u>NP_000393</u> <u>Entrez Gene 24377 RatEntrez Gene 481088 DogEntrez Gene 2539 Human</u> <u>P11413</u>

	Glucose 6 Phosphate Dehydrogenase (G6PD) Goat Polyclonal Antibody – TA303241	
Background:	This gene encodes glucose-6-phosphate dehydrogenase. This protein is a cytosolic enzyme encoded by a housekeeping X-linked gene whose main function is to produce NADPH, a key electron donor in the defense against oxidizing agents and in reductive biosynthetic reactions. G6PD is remarkable for its genetic diversity. Many variants of G6PD, mostly produced from missense mutations, have been described with wide ranging levels of enzyme activity and associated clinical symptoms. G6PD deficiency may cause neonatal jaundice, acute hemolysis, or severe chronic non-spherocytic hemolytic anemia. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]	
Synonyms:	G6PD1	
Protein Families:	ein Families: Druggable Genome	
Protein Pathways: Glutathione metabolism, Metabolic pathways, Pentose phosphate pathway
