

## **Product datasheet for TA306027**

## **BIRC5 Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type:** Primary Antibodies

**Applications:** IHC, WB

Recommended Dilution: WB: 1 ug/mL, ICC: 10 ug/mL

Reactivity: Mouse
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

**Immunogen:** Survivin antibody was raised against a synthetic peptide corresponding to amino acids near

the carboxy terminus of mouse Survivin.

**Formulation:** PBS containing 0.02% sodium azide.

**Concentration:** 1ug/ul

**Purification:** Affinity chromatography purified via peptide column

**Conjugation:** Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Gene Name:** baculoviral IAP repeat containing 5

Database Link: NP 001159

015392

**Background:** Apoptosis, or programmed cell death, is related to many diseases, such as cancer. Apoptosis

is triggered by a variety of stimuli including members in the TNF family and prevented by the inhibitor of apoptosis (IAP) proteins. IAP proteins form a conserved gene family that binds to and inhibits cell death proteases. A novel IAP protein was recently identified and designated survivin, apoptosis inhibitor 4 (API4), and TIAP (1-3). Survivin/TIAP interacted with the

processed form of caspase-3 and inhibited its proteolytic activity. Survivin/TIAP is

predominantly expressed in tissues of embryos, transformed cell lines, and many human

cancers and lymphomas (1,3).

Synonyms: API4; EPR-1; IAP4; Survivin
