

## **Product datasheet for TA306092**

## **CARD15 (NOD2) Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type:** Primary Antibodies

Applications: IF, WB

Recommended Dilution: WB: 2 - 4 ug/mL, ICC: 10 ug/mL, IF: 20 ug/mL

Reactivity: Human Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Rabbit NOD2 polyclonal antibody was raised against a synthetic peptide corresponding to 14

amino acids at the carboxy terminus of human NOD2.

**Formulation:** PBS containing 0.02% sodium azide.

Concentration: 1 mg/ml

**Purification:** Immunoaffinity chromatography purified IgG

**Conjugation:** Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Gene Name:** nucleotide binding oligomerization domain containing 2

Database Link: NP 071445

Entrez Gene 64127 Human

Q9HC29

Background: Apaf-1 and NOD1 are members of a new family (1), which are involved in the regulation of

apoptosis and immune response. Each of them contains a caspase recruitment domain (CARD) and a nucleotide-binding oligomerization domain (NOD). A third member in this family was recently identified and designated NOD2 (2). NOD2 interacts with RICK via a homophilic CARD-CARD interaction. NOD2 activates NF-kappaB, which is regulated by its carboxy-terminal leucine-rich repeat domain that acts as an intracellular receptor for components of bacteria. The variants of NOD2, either a frameshift or a missense, were associated with Crohn's disease (3,4) that is a main type of chronic inflammatory bowel

disease.
