

Product datasheet for TA306340

BCL2A1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, IHC, WB

Recommended Dilution: WB: 1 - 2 ug/mL, IF: 20 ug/mL

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Bfl-1 antibody was raised against a 14 amino acid peptide from near the amino terminus of

human Bfl-1.

Formulation: PBS containing 0.02% sodium azide.

Concentration: 1ug/ul

Purification: Affinity chromatography purified via peptide column

Conjugation: Unconjugated

Storage: Antibody can be stored at 4°C up to one year. Antibodies should not be exposed to

prolonged high temperatures.

Stability: Stable for 12 months from date of receipt.

Gene Name: BCL2 related protein A1

Database Link: NP 004040

Entrez Gene 597 Human

Background:

Apoptosis plays a major role in normal organism development, tissue homeostasis, and removal of damaged cells and is caused by caspase activation. Proteins that comprise the Bcl-2 family appear to control the activation of these enzymes. One such member is multidomain antiapoptotic protein Bfl-1, which is overexpressed in stomach and other cancers. Bfl-1 can interact with Bax and suppress apoptosis by inhibiting the release of cytochrome c and caspase-3 activation. It is upregulated in cisplatin-resistant human bladder tumors, suggesting that its expression may be important for cisplatin resistance and inhibition of apoptosis in cancer cells. At least two isoforms of Bfl-1 are known to exist. Presumably due to post-translational modifications, Bfl-1 is often observed at higher molecular weight in SDS-PAGE than its predicted molecular weight would suggest.

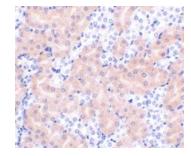

Synonyms:

ACC-1; ACC-2; ACC1; ACC2; BCL2L5; BFL1; GRS; HBPA1

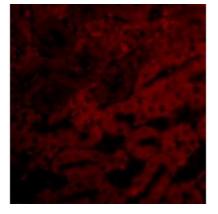

Product images:

Western blot analysis of Bfl-1 in mouse kidney tissue lysate with Bfl-1 antibody at (A) 1 and (B) 2 ug/ml.

Immunohistochemistry of Bfl-1 in mouse kidney tissue with Bfl-1 antibody at 2 ug/ml.

Immunofluorescence of Bfl-1 in Mouse Kidney tissue with Bfl-1 antibody at 20 ug/mL.
