

Product datasheet for TA306415

Neuritin (NRN1) Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	IF, IHC, WB
Recommended Dilution:	WB: 5 and 10 ug/mL, ICC: 5 ug/mL, IF: 20 ug/mL
Reactivity:	Human, Mouse
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Neuritin antibody was raised against a 20 amino acid synthetic peptide from near the center of human neuritin. The immunogen is located within amino acids 70 - 120 of Neuritin.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1ug/ul
Purification:	Affinity chromatography purified via peptide column
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	neuritin 1
Database Link:	<u>NP_057672</u> <u>Entrez Gene 68404 MouseEntrez Gene 51299 Human</u> <u>Q9NPD7</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

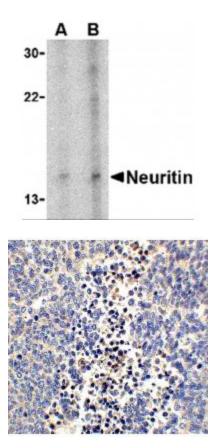

GRIGENE Neuritin (NRN1) Rabbit Polyclonal Antibody – TA306415

Background:As the nervous system of a complex organism develops, it establishes functional networks
through the growth and retraction of synaptic connections from growing axons and
dendrites. This synaptic remodeling involves neuro-transmitter signaling, activation of
neurotrophin receptors and alterations in gene expression. One such gene whose expression
is increased by neural activity is neuritin, a GPI-anchored protein that is expressed in
postmitotic differentiating neurons of the developing nervous system. Its expression is also
induced by the neurotrophins BDNF and NT-3. Purified recombinant neuritin promotes
neurite outgrowth and arborization in primary embryonic neuronal cultures, suggesting that
neuritin may play a role as a downstream effector of activity-induced neurite outgrowth.
More recent experiments have shown that neuritin is required for the androgen-induced
axonal elongation in motor neurons and is upregulated following spinal cord injury,
suggesting that neuritin may also play a role in survival and axonal regeneration.

Synonyms:

dJ380B8.2; NRN

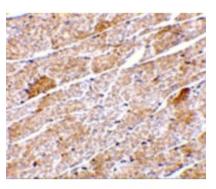

Product images:

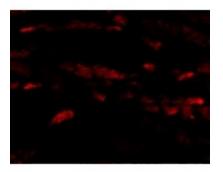

Western blot analysis of neuritin in Daudi cell lysate with neuritin antibody at (A) 5 and (B) 10ug/ml.

Immunohistochemistry of Neuritin in human brain tissue with Neuritin antibody at 2.5ug/ml.
