#### **GRIGENE** Stathmin 1 (STMN1) Rabbit Polyclonal Antibody – TA306434

Background:Op18 belongs to the stathmin family of genes and encodes a ubiquitous cytosolic<br/>phosphoprotein that may function as an intracellular relay integrating several signaling<br/>pathways such as those involved in cell proliferation and differentiation. Op18 has also been<br/>shown to be involved in the regulation of the microtubule filament system by destabilizing<br/>microtubules, thereby preventing assembly and promoting the disassembly of microtubules.<br/>More recently, op18 has been implicated as a potential target of the ASK1-p38 MAP kinase<br/>cascade, suggesting that the ASK1-p38 cascade may regulate microtubule dynamics through<br/>op18. Op18 is highly expressed in a wide variety of human malignancies, including leukemia,<br/>prostate cancer, ovarian carcinoma, and breast carcinoma, suggesting that op18 may be an<br/>ideal target for anti-cancer therapeutics.

Synonyms: C1orf215; Lag; LAP18; OP18; PP17; PP19; PR22; SMN
