

Product datasheet for TA306451

FYB1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, WB

Recommended Dilution: WB: 0.5 - 1 ug/mL, ICC: 10 ug/mL, IF: 20 ug/mL

Reactivity: Human Rabbit Host: Isotype: **IgG**

Clonality: Polyclonal

Immunogen: ADAP antibody was raised against a 17 amino acid peptide from near the amino terminus of

human ADAP.

Formulation: PBS containing 0.02% sodium azide.

Concentration: 1ug/ul

Purification: Affinity chromatography purified via peptide column

Conjugation: Unconjugated

Store at -20°C as received. Storage:

Stability: Stable for 12 months from date of receipt.

Gene Name: FYN binding protein

Database Link: NP 001456

Entrez Gene 2533 Human

O15117

Background: The adhesion and degranulation adaptor protein (ADAP) was initially identified as a molecular

> adapter that couples T cell receptor (TCR) stimulation to the avidity of integrins governing T cell adhesion. TCR stimulation promotes the formation of a multi-protein complex containing CARMA1, MALT1, and BCL-10, which through the association of ADAP, ultimately activates the NF-kappaB family of transcription factors. More recent experiments have shown that ADAP controls optimal T cell proliferation, cytokine production, and expression of the Bcl-2 family member Bcl-x(L), suggesting that ADAP regulates T cell activation by promoting antigendependent T cell-antigen presenting cell (APC) activation. At least three isoforms of ADAP are

known to exist.
