# Product datasheet for TA306506

## SP110 Rabbit Polyclonal Antibody

### **Product data:**

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1 - 2 ug/mL
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	IPR1 antibody was raised against a 16 amino acid peptide near the amino terminus of the human IPR1.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1ug/ul
Purification:	Affinity chromatography purified via peptide column
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	SP110 nuclear body protein
Database Link:	<u>NP_004501</u> <u>Entrez Gene 3431 Human</u> <u>Q9HB58</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** SP110 Rabbit Polyclonal Antibody – TA306506

Background:Susceptibility to tuberculosis (TB) in mice has recently been attributed to the IPR1 gene. IPR1<br/>is a member of the SP100/SP140 family of nuclear body proteins and encodes a leukocyte-<br/>specific nuclear body component. The protein can function as an activator of gene<br/>transcription and may serve as a nuclear hormone receptor coactivator. Alternative splicing<br/>has been observed for this gene and three transcript variants, encoding distinct isoforms,<br/>have been identified. SP110 is the closest homolog of the IPR1 protein in humans. The<br/>IPR1/Sp110 gene product might play a role in integrating signals generated by intracellular<br/>pathogens with mechanisms controlling innate immunity, cell death, and pathogenesis.<br/>IPR1/Sp110 is up-regulated after infection with M. tuberculosis and required by Anaplasma<br/>phagocytophilum for infection of human promyelocytic cells. Defects in Sp110 are a cause of<br/>severely impaired resistance to infection by M. tuberculosis.

Synonyms: IFI41; IFI75; IPR1; VODI
