

Product datasheet for TA306571

Product datasneet for 1A30037

VPS53 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Reactivity: WB: 0.5 - 1 ug/mL Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: VPS53 antibody was raised against a 18 amino acid peptide from near the center of human

VPS53.

Formulation: PBS containing 0.02% sodium azide.

Concentration: 1ug/ul

Purification: Affinity chromatography purified via peptide column

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: VPS53, GARP complex subunit

Database Link: NP 001121631

Q5VIR6

Background: The sorting of acid hydrolases to lysosomes rely on mannose 6-phosphate receptors that

cycle between the trans-Golgi network (TGN) and endosomes. The maintenance of this cycle requires the function of the mammalian Golgi-associated retrograde protein (GARP) complex which is composed of three subunits: VPS52, VPS53, and VPS54. Depletion of any of these three proteins, such as by RNAi, impairs the retrograde transport of multiple TGN proteins. VPS53 was identified as an HIV dependency factor (HDF) and plays a role in viral entry to the cell, suggesting that VPS53 may be an important drug target in HIV treatment. At least five

isoforms of VPS53 are known to exist.

Synonyms: HCCS1; hVps53L; PCH2E; pp13624
