Product datasheet for TA306767

MATN1 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1 - 2 ug/mL
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	MATN1 antibody was raised against a 12 amino acid peptide from near the amino terminus of human MATN1.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1ug/ul
Purification:	Affinity chromatography purified via peptide column
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	matrilin 1, cartilage matrix protein
Database Link:	<u>NP_002370</u> <u>Entrez Gene 17180 MouseEntrez Gene 297894 RatEntrez Gene 4146 Human</u> <u>P21941</u>

GRIGENE MATN1 Rabbit Polyclonal Antibody – TA306767

Background: Matrilins (MATNs) are a family of non-collagenous extra-cellular matrix (ECM) proteins consisting of four known members that have been proposed to play key roles in modulating cellular phenotypes during chondrogenesis of mesenchymal stem cells (MSCs). MATN1 and MATN3 are expressed specifically in cartilage and are among the most up-regulated ECM proteins during chondrogenesis. MATN1 is composed of two Willebrand Factor A (vWFA) domains separated by one EGF-like domain, whereas MATN3 is composed of a single Nterminal vWFA domain followed by four epidermal growth factor (EGF) repeats and a coiledcoil domain. MATN1 or MATN3 may play a role in modulating chondrogenesis during the chondrocyte differentiation process. Mutations of this gene have been associated with variety of inherited chondrodysplasias. Recent studies show that the MATN1 promoter region was associated with both susceptibility and disease progression in Adolescent idiopathic scoliosis.

Synonyms: CMP; CRTM

Product images:

Western blot analysis of MATN1 in mouse liver tissue lysate with MATN1 antibody at (A) 1 and (B) 2 ug/ml.
