

# Product datasheet for TA306774

# Her2 (ERBB2) Chicken Polyclonal Antibody

## **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	IF, IHC, WB
Recommended Dilution:	WB: 1 - 2 ug/mL, ICC: 2.5 ug/mL, IF: 20 ug/mL
Reactivity:	Human, Mouse, Rat
Host:	Chicken
lsotype:	IgY
Clonality:	Polyclonal
Immunogen:	erbB-2 antibody was raised against a 19 amino acid peptide near the carboxy terminus of human erbB-2.
Formulation:	PBS containing 0.02% sodium azide.
Concentration:	1ug/ul
Purification:	Affinity chromatography purified via peptide column
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	erb-b2 receptor tyrosine kinase 2
Database Link:	<u>NP_004439</u> <u>Entrez Gene 2064 Human</u> <u>P04626</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** Her2 (ERBB2) Chicken Polyclonal Antibody – TA306774

Background:The ErbB family consists of four closely related tyrosine kinase receptors that act as potent<br/>mediators of normal cell growth and development. Aberrant expression or function of one or<br/>more of these receptors can play a major role in the development and evolution of cancer.<br/>ErbB-2, also known as HER2, has been implicated in the evolution of both breast and gastric<br/>cancers, and is evident in other cancer types such as ovarian and salivary gland tumors.<br/>ErbB-2 possesses an active tyrosine kinase domain, but no direct ligand has been identified<br/>yet. ErbB-2 is the preferred binding partner to the other members of the ErbB family and is<br/>though to act primarily through the Ras-MAPK, Pl3k-PKB/Akt, and PLC-PKC signaling<br/>pathways. Numerous anti-cancer strategies have been employed against erbB-2, such as<br/>antibody-based therapies to prevent ligand binding or receptor activation through<br/>dimerization, antibody-dependent cell mediated cytotoxicity, in addition to direct kinase<br/>inhibition to prevent molecular activation/downstream signaling.

Synonyms:

CD340; HER-2; HER2; MLN 19; NEU; neu; NGL; TKR1

### **Product images:**

Western blot analysis of erbB-2 in rat liver tissue lysate with erbB-2 antibody at (A) 1 and (B) 2 ug/ml.

Immunohistochemistry of erbB-2 in human liver tissue with erbB-2 antibody at 2.5 ug/ml.
