Itgb3 Hamster Monoclonal Antibody [Clone ID: 2C9.G3]

Product data:

Product Type: Primary Antibodies

Clone Name: 2C9.G3

Applications: FC

Recommended Dilution: Flow, IHC, Functional Assay

Reactivity: Mouse, Rat
Host: Hamster
Clonality: Monoclonal

Formulation: Aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Concentration: lot specific

Purification: Affinity purified
Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: integrin beta 3

Database Link: NP 058060

Entrez Gene 29302 RatEntrez Gene 16416 Mouse

054890

Background: The 2C9.G3 (HMb3-1) monoclonal antibody reacts with mouse and rat CD61, also known as

the integrin β 3. CD61 is expressed by activated T cells, granulocytes, and platelet. CD61 associates non-covalently with two integrin α subunits; α V (CD51) to form Vitronectin

Receptor and αlib (CD41) to form gpllb/llla. These heterodimeric complexes are responsible for adhesion to extracellular matrix components including fibrinogen, fibronectin, fibronectin,

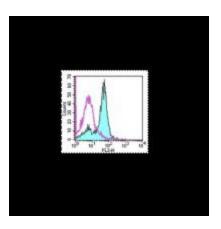

vitronectin, thrombospondin and von Willebrand factor.

Synonyms: CD61; GP3A; GPIIIa
