Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 1000-5000 WB positive control: Human fetal brain tissue IHC: 50-200 Positive control: Human gasrtic cancer Predicted cell location: Cytoplasm
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide corresponding to a region derived from 102-118 amino acids of Human cystatin C
Formulation:	PBS pH7.3, 0.05% NaN3, 50% glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	16 kDa
Gene Name:	cystatin C
Database Link:	<u>NP_000090</u> <u>Entrez Gene 1471 Human</u> <u>P01034</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** Cystatin C (CST3) Rabbit Polyclonal Antibody – TA321058

Background:The cystatin superfamily encompasses proteins that contain multiple cystatin-like sequences.<br/>Some of the members are active cysteine protease inhibitors; while others have lost or<br/>perhaps never acquired this inhibitory activity. There are three inhibitory families in the<br/>superfamily; including the type 1 cystatins (stefins); type 2 cystatins and the kininogens. The<br/>type 2 cystatin proteins are a class of cysteine proteinase inhibitors found in a variety of<br/>human fluids and secretions; where they appear to provide protective functions. The cystatin<br/>locus on chromosome 20 contains the majority of the type 2 cystatin genes and<br/>pseudogenes. This gene is located in the cystatin locus and encodes the most abundant<br/>extracellular inhibitor of cysteine proteases; which is found in high concentrations in<br/>biological fluids and is expressed in virtually all organs of the body. A mutation in this gene<br/>has been associated with amyloid angiopathy. Expression of this protein in vascular wall<br/>smooth muscle cells is severely reduced in both atherosclerotic and aneurysmal aortic<br/>lesions; establishing its role in vascular disease.

Synonyms: ARMD11; HEL-S-2

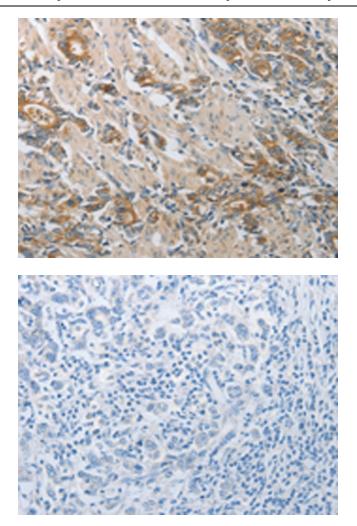

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Transmembrane

## **Product images:**

Gel: 12%SDS-PAGE Lysate: 40 µg Lane: Human fetal brain tissue Primary antibody: TA321058 (CST3 Antibody) at dilution 1/2400 Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution Exposure time: 2 minutes
