

Product datasheet for TA321138S

Alkaline Phosphatase (ALPL) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: IHC Recommended Dilution: IHC: 200-400 Positive control: Human esophagus cancer Predicted cell location: Cytoplasm **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Immunogen: Fusion protein corresponding to a region derived from 2-329 amino acids of Human Alkaline phosphatase Formulation: PBS pH7.3, 0.05% NaN3, 50% glycerol **Purification:** Antigen affinity purification **Conjugation:** Unconjugated Store at -20°C as received. Storage: Stable for 12 months from date of receipt. Stability: Gene Name: alkaline phosphatase, liver/bone/kidney Database Link: NP 000469 Entrez Gene 11647 MouseEntrez Gene 25586 RatEntrez Gene 249 Human P05186

GRIGENE Alkaline Phosphatase (ALPL) Rabbit Polyclonal Antibody – TA321138S

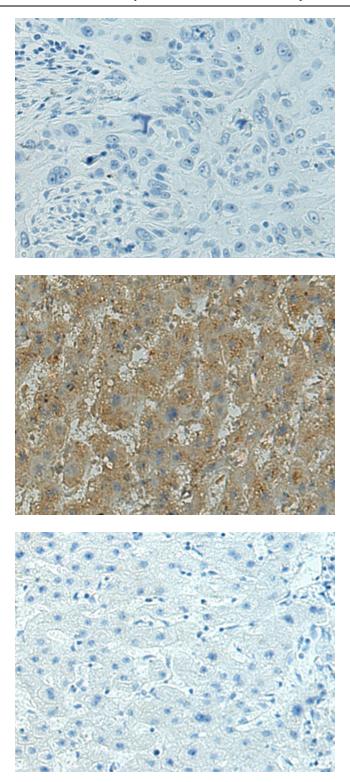

Background:There are at least four distinct but related alkaline phosphatases: intestinal; placental;
placental-like; and liver/bone/kidney (tissue non-specific). The first three are located together
on chromosome 2; while the tissue non-specific form is located on chromosome 1. The
product of this gene is a membrane bound glycosylated enzyme that is not expressed in any
particular tissue and is; therefore; referred to as the tissue-nonspecific form of the enzyme.
The exact physiological function of the alkaline phosphatases is not known. A proposed
function of this form of the enzyme is matrix mineralization; however; mice that lack a
functional form of this enzyme show normal skeletal development. This enzyme has been
linked directly to hypophosphatasia; a disorder that is characterized by hypercalcemia and
includes skeletal defects. The character of this disorder can vary; however; depending on the
specific mutation since this determines age of onset and severity of symptoms. Alternatively
spliced transcript variants have been described.Synonyms:AP-TNIAP: HOPS: TNIAP: TNISALP

Synonyms:	AP-TNAP; APTNAP; HOPS; TNAP; TNSALP
Protein Families:	Druggable Genome
Protein Pathways:	Folate biosynthesis, Metabolic pathways
