

## **Product datasheet for TA321378S**

## **AlaRS (AARS) Rabbit Polyclonal Antibody**

## **Product data:**

**Product Type:** Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 50-200

Positive control: Human cervical cancer Predicted cell location: Cytoplasm

Reactivity: Human, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide corresponding to N terminal 14 amino acids of human alanyl-tRNA

synthetase

Formulation: PBS pH7.3, 0.05% NaN3, 50% glycerol

**Purification:** Antigen affinity purification

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Gene Name:** alanyl-tRNA synthetase

Database Link: NP 001596

Entrez Gene 292023 RatEntrez Gene 16 Human

P49588

Background: The human alanyl-tRNA synthetase (AARS) belongs to a family of tRNA synthases, of the class

II enzymes. Class II tRNA synthases evolved early in evolution and are highly conserved. This is reflected by the fact that 498 of the 968-residue polypeptide human AARS shares 41% identity witht the E.coli protein. tRNA synthases are the enzymes that interpret the RNA code

and attach specific aminoacids to the tRNAs that contain the cognate trinucleotide

anticodons. They consist of a catalytic domain which interacts with the amino acid acceptor-T

psi C helix of the tRNA, and a second domain which interacts with the rest of the tRNA

structure.
