Background:	GLUT5?is a?fructose?transporter expressed on the apical border of?enterocytes?in the?small intestine.?GLUT5 allows for fructose to be transported from the?intestinal lumen?into the enterocyte by?facilitated diffusion?due to fructose's high concentration in the intestinal lumen. GLUT5 is also expressed in?skeletal muscle; testis; kidney; fat tissue; and brain. Fructose malabsorption or Dietary Fructose Intolerance is a dietary disability of the small intestine; where the amount of fructose carrier in enterocytes is deficient. In humans the GLUT5 protein is encoded by the SLC2A5 gene.
