Caspase 3 (CASP3) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: ELISA: 1:1000-10000, IHC: 1:25-100

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide corresponding to a region derived from 485-499 of Human caspase 3,

apoptosis-related cysteine peptidase

Formulation: PBS pH7.3, 0.05% NaN3, 50% glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: caspase 3

Database Link: NP 004337

P42574

Background: This gene encodes a protein which is a member of the cysteine-aspartic acid protease

(caspase) family. Sequential activation of caspases plays a central role in the execution-phase

of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic

processing at conserved aspartic residues to produce two subunits; large and small; that dimerize to form the active enzyme. This protein cleaves and activates caspases 6; 7 and 9; and the protein itself is processed by caspases 8; 9 and 10. It is the predominant caspase involved in the cleavage of amyloid-beta 4A precursor protein; which is associated with neuronal death in Alzheimer's disease. Alternative splicing of this gene results in two

transcript variants that encode the same protein.

Synonyms: CPP32; CPP32B; SCA-1

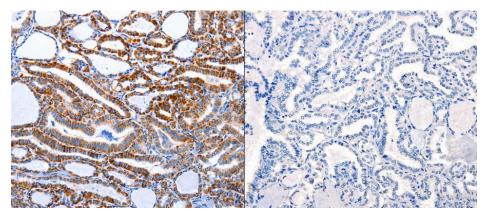

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Protease

Protein Pathways: Alzheimer's disease, Amyotrophic lateral sclerosis (ALS), Apoptosis, Colorectal cancer,

Epithelial cell signaling in Helicobacter pylori infection, Huntington's disease, MAPK signaling pathway, Natural killer cell mediated cytotoxicity, p53 signaling pathway, Parkinson's disease,

Pathways in cancer, Viral myocarditis

Product images:

Predicted cell location: Cytoplasm. Positive control: Human thyroid cancer tissue. Recommended dilution: 1/25-100 The image on the left is immunohistochemistry of paraffinembedded Human thyroid cancer tissue using CASP3 antibody at dilution 1/15, on the right is treated with the synthetic peptide.
