

Product datasheet for TA322534

HDAC4 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC

Recommended Dilution: IHC: 25-100

Positive control: Human tonsil Predicted cell location: Cytoplasm

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide corresponding to a region derived from 536-548 amino acids of Human

histone deacetylase 4

Formulation: PBS pH7.3, 0.05% NaN3, 50% glycerol

Concentration: lot specific

Purification: Antigen affinity purification

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: histone deacetylase 4

Database Link: NP 006028

Entrez Gene 208727 MouseEntrez Gene 363287 RatEntrez Gene 9759 Human

P56524

Background: Histones play a critical role in transcriptional regulation; cell cycle progression; and

developmental events. Histone acetylation/deacetylation alters chromosome structure and affects transcription factor access to DNA. The protein encoded by this gene belongs to class II of the histone deacetylase/acuc/apha family. It possesses histone deacetylase activity and represses transcription when tethered to a promoter. This protein does not bind DNA directly; but through transcription factors MEF2C and MEF2D. It seems to interact in a

multiprotein complex with RbAp48 and HDAC3.
