

## Product datasheet for **TA322841S**

### FOXN1 Rabbit Polyclonal Antibody

#### Product data:

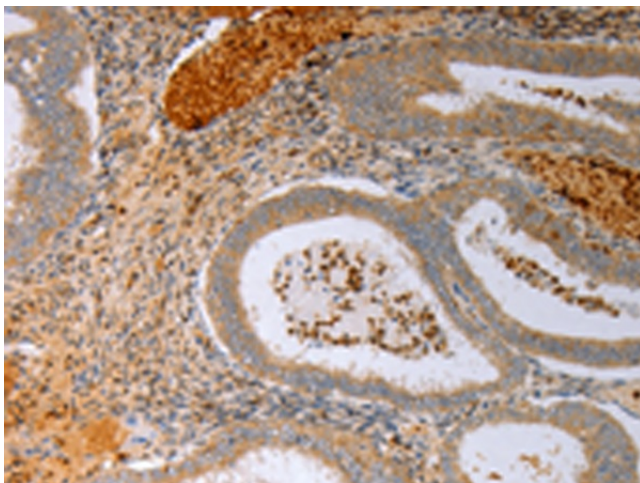

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 25-100 Positive control: Human cervical cancer Predicted cell location: Cytoplasm, Nucleus
Reactivity:	Human
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide corresponding to a region derived from 586-600 amino acids of Human forehead box N1
Formulation:	PBS pH7.3, 0.05% NaN <sub>3</sub> , 50% glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	forehead box N1
Database Link:	<a href="#">NP_003584</a> <a href="#">Entrez Gene 8456 Human</a> <a href="#">O15353</a>
Background:	Mutations in the winged-helix transcription factor gene at the nude locus in mice and rats produce the pleiotropic phenotype of hairlessness and athymia; resulting in a severely compromised immune system. This gene is orthologous to the mouse and rat genes and encodes a similar DNA-binding transcription factor that is thought to regulate keratin gene expression. A mutation in this gene has been correlated with T-cell immunodeficiency; the skin disorder congenital alopecia; and nail dystrophy. Alternative splicing in the 5' UTR of this gene has been observed.
Synonyms:	FKHL20; RONU; WHN
