Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	WB: 500-2000 WB positive control: Human fetal brain and kidney tissue IHC: 25-100 Positive control: Human thyroid cancer Predicted cell location: Cytoplasm
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
lsotype:	lgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide corresponding to a region derived from 100-115 amino acids of Human ADP-ribosylation factor 1
Formulation:	PBS pH7.3, 0.05% NaN3, 50% glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	21 kDa
Gene Name:	ADP ribosylation factor 1
Database Link:	<u>NP_001649</u> <u>Entrez Gene 11840 MouseEntrez Gene 64310 RatEntrez Gene 375 Human</u> <u>P84077</u>

### **GRIGENE** ARF1 Rabbit Polyclonal Antibody – TA323132

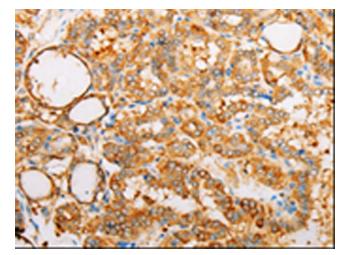

Background:ADP-ribosylation factor 1 (ARF1) is a member of the human ARF gene family. The family<br/>members encode small guanine nucleotide-binding proteins that stimulate the ADP-<br/>ribosyltransferase activity of cholera toxin and play a role in vesicular trafficking as activators<br/>of phospholipase D. The gene products; including 6 ARF proteins and 11 ARF-like proteins;<br/>constitute a family of the RAS superfamily. The ARF proteins are categorized as class I (ARF1;<br/>ARF2 and ARF3); class II (ARF4 and ARF5) and class III (ARF6); and members of each class<br/>share a common gene organization. The ARF1 protein is localized to the Golgi apparatus and<br/>has a central role in intra-Golgi transport. Multiple alternatively spliced transcript variants<br/>encoding the same protein have been found for this gene.

Synonyms:ADP-ribosylation factor 1; OTTHUMP00000035715Protein Pathways:Vibrio cholerae infection
