

Product datasheet for **TA323224**

alpha Adducin (ADD1) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 50-200 Positive control: Human lung cancer Predicted cell location: Cytoplasm
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Full length fusion protein
Formulation:	PBS pH7.3, 0.05% NaN ₃ , 50% glycerol
Concentration:	lot specific
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	adducin 1
Database Link:	NP_001110 Entrez Gene 11518 Mouse Entrez Gene 24170 Rat Entrez Gene 118 Human P35611

Background:

Adducins are a family of cytoskeleton proteins encoded by three genes (alpha; beta; gamma). Adducin is a heterodimeric protein that consists of related subunits; which are produced from distinct genes but share a similar structure. Alpha- and beta-adducin include a protease-resistant N-terminal region and a protease-sensitive; hydrophilic C-terminal region. Alpha- and gamma-adducins are ubiquitously expressed. In contrast; beta-adducin is expressed at high levels in brain and hematopoietic tissues. Adducin binds with high affinity to Ca(2+)/calmodulin and is a substrate for protein kinases A and C. Alternative splicing results in multiple variants encoding distinct isoforms; however; not all variants have been fully described.

Synonyms:

ADDA

Protein Families:

Druggable Genome
