| Product Type:         | Primary Antibodies  |
|-----------------------|---|
| Applications:         | IHC   |
| Recommended Dilution: | IHC: 50-200<br>Positive control: Human lung cancer<br>Predicted cell location: Cytoplasm  |
| Reactivity:           | Human, Mouse, Rat   |
| Host:                 | Rabbit  |
| lsotype:              | lgG   |
| Clonality:            | Polyclonal  |
| Immunogen:            | Synthetic peptide peptide corresponding to a region derived from 496-509 amino acids of human solute carrier family 2 (facilitated glucose transporter), member 4   |
| Formulation:          | PBS pH7.3, 0.05% NaN3, 50% glycerol   |
| Concentration:        | lot specific  |
| Purification:         | Antigen affinity purification   |
| Conjugation:          | Unconjugated  |
| Storage:              | Store at -20°C as received.   |
| Stability:            | Stable for 12 months from date of receipt.  |
| Gene Name:            | solute carrier family 2 member 4  |
| Database Link:        | <u>NP_001033</u><br><u>Entrez Gene 20528 MouseEntrez Gene 25139 RatEntrez Gene 6517 Human</u><br><u>P14672</u>  |
| Background:           | This gene is a member of the solute carrier family 2 (facilitated glucose transporter) family<br>and encodes a protein that functions as an insulin-regulated facilitative glucose transporter.<br>In the absence of insulin; this integral membrane protein is sequestered within the cells of<br>muscle and adipose tissue. Within minutes of insulin stimulation; the protein moves to the<br>cell surface and begins to transport glucose across the cell membrane. Mutations in this gene<br>have been associated with noninsulin-dependent diabetes mellitus (NIDDM). |
| Synonyms:             | GLUT4   |

# **GLUT4 (SLC2A4) Rabbit Polyclonal Antibody – TA323292**

Protein Families: Druggable Genome, Transmembrane

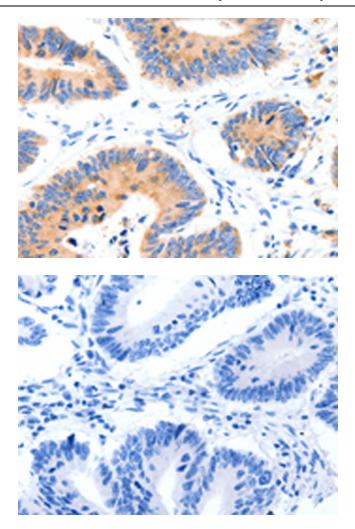

**Protein Pathways:** Adipocytokine signaling pathway, Insulin signaling pathway, Type II diabetes mellitus
