	Glutathione Reductase (GSR) Rabbit Polyclonal Antibody – TA323577
Background:	This gene encodes a member of the class-I pyridine nucleotide-disulfide oxidoreductase family. This enzyme is a homodimeric flavoprotein. It is a central enzyme of cellular antioxidant defense; and reduces oxidized glutathione disulfide (GSSG) to the sulfhydryl form GSH; which is an important cellular antioxidant. Rare mutations in this gene result in hereditary glutathione reductase deficiency. Multiple alternatively spliced transcript variants encoding different isoforms have been found.
Synonyms:	HEL-75
Protein Families	S: Druggable Genome
Protein Pathwa	ys: Glutathione metabolism
