

Product datasheet for **TA324144S**

IL17RC Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	IHC: 25-100 Positive control: Human esophagus cancer Predicted cell location: Cytoplasm, Cell membrane
Reactivity:	Human
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fusion protein corresponding to N terminal 357 amino acids of Human Interleukin-17 receptor C
Formulation:	PBS pH7.3, 0.05% NaN ₃ , 50% glycerol
Purification:	Antigen affinity purification
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	interleukin 17 receptor C
Database Link:	NP_703193 Entrez Gene 84818 Human Q8NAC3
Background:	This gene encodes a single-pass type I membrane protein that shares similarity with the interleukin-17 receptor (IL-17RA). Unlike IL-17RA; which is predominantly expressed in hemopoietic cells; and binds with high affinity to only IL-17A; this protein is expressed in nonhemopoietic tissues; and binds both IL-17A and IL-17F with similar affinities. The proinflammatory cytokines; IL-17A and IL-17F; have been implicated in the progression of inflammatory and autoimmune diseases. Multiple alternatively spliced transcript variants encoding different isoforms have been detected for this gene; and it has been proposed that soluble; secreted proteins lacking transmembrane and intracellular domains may function as extracellular antagonists to cytokine signaling.
