Western blot analysis of anti-ROS Pab (Cat. #TA324969) in HL-60 cell lysate. ROS (arrow) was detected using purified Pab. Secondary HRP-antirabbit was used for signal visualization with chemiluminescence.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma; HC = hepatocarcinoma.
